

Mind Blowing Statistics

A brain has 86 billion neurons, 2.5 million Gb of storage, and over 50,000 thoughts per day.

On an analog TV set turned to a dead channel, around 1% of the static is left over radiation from the Big Bang.

2/3 of all the people in the history of the world that have lived to be 65 years old are alive today.

More than half (57%) of the incidents of bullying stop after another student intervenes.

By 2050 there will be more plastic in the ocean than there are fish.

In the United States people spend over \$40 billion on dog food.

15% of Google searches have never been searched before.

The world's oldest shark is 512 years old. That same shark was 12 years old when Shakespeare retired.

America's drivers cover a combined 2.6 trillion miles annually.

More than 6,000 people in the United States check into the emergency room with pillow-related injuries each year.

There is more processing power in a TI-83 calculator than in the computer that landed Apollo 11 on the moon.

The average drunk driver drives under the influence 80 times before first being arrested.

If you shuffle a standard deck of playing cards, it is overwhelmingly probable that nobody has every shuffled the same sequence of cards before.

The human body contains about 100 trillion cells but only about 1 in 10 of those are human. The rest are from bacteria, viruses and other microorganisms.

One-third of fish at restaurants and grocery stores are mislabeled.

2-5% of people serving time behind bars and 1 in 25 people on death row are innocent.

The lightest material is metallic microlattice. Its density is as low as 0.99 mg/cm³. It weighs 0.00561 pounds per cubic foot while air weighs around 0.0807 lbs per cubic foot.

90% of people live in the Northern Hemisphere.

A garden caterpillar has over 4000 muscles in its body, which is 6 times more than humans.

A teaspoon of a neutron star weighs about 6 billion tons.

Every day, our hearts produce enough energy to drive a truck for 20 miles.

58% of the adult population in the United States never reads another book after high school.

Americans eat approximately 100 acres of pizza each day, or about 350 slices per second.

The most children born to the same woman is 69.

More than 80% of our oceans are unmapped, unobserved, and unexplored.

The human nose can remember 50,000 different scents.

Over 95% of animals used for meat eat genetically modified food.

There were 364,355 planes destroyed in World War II, which is more than exist today.

69% of children aged 2-5 can use a computer mouse but only 11% can tie their shoelaces.

A snail can nap for up to 3 years.

In Japan, more paper is used to make manga than toilet paper.

1 gram of uranium has 20 billion calories.

The risk of a heart attack is about 20% greater on Mondays for adult men and 15% greater for adult women.

Every \$1 invested in clean water and toilets generates \$4 in increased global productivity.

More people are killed by vending machines than by sharks.

There are more McDonalds' in America than the population of 11 different countries.

The Amazon Rainforest releases around 20 billion tonnes of moisture to the atmosphere every single day, which is 40 trillion pounds of water vapor.

False news stories are 70% more likely to be retweeted than true stories.

1/4 of all known species of animal are beetles.

80% of Soviet men born in 1923 did not live to see 1946, the end of World War II.

0.3% of solar energy from the Sahara is enough to power the whole of Europe.

56% of people believe that Arabic numbers shouldn't be taught in American schools.

It's estimated that 99% of all the species that have ever lived on earth are now extinct.

Humans share 99.9% of all their DNA but every single person has a sequence that has never existed before.

There are 3 trillion trees on Earth but only 300 to 400 billion stars in the Milky Way.

Utensils have only been around for 0.01% of human existence.

It took approximately 400,000 people to send 24 people to the Moon during the Apollo program, which is an astronaut to worker ratio of 1:16,667.

0.0911346261% of public schools in the United States are STEM schools.
