

Time Test Procedure

1. Click on the link to start.

Use Google Chrome, not Microsoft Edge.

Begin IMMEDIATELY. The focus is on the first entry.

2. Enter responses in browser.

You do not need to do the problems in order.

The tab key will move you to the next entry box. A numeric keypad helps.

3. If you finish early, check answers.

Do NOT reload or exit the page, or you will have to go again.

The page has a timer and will automatically submit for correction.

4. Review your graded results.

Do NOT reload or exit the page, or you will have to go again.

Pay particular attention to any you get incorrect.

5. Save and upload the results page.

Click on “:/More tools/Save page as...” and use “Webpage, Complete”.

I only want the HTML page itself (not the other folder) uploaded to Schoology.

6. Practice as needed on your own.

If you need to work on a skill, you should.

The programs work on your phone, so you can practice anywhere.

Let me know if there is something I could easily add that would help.
